SUMMARY

Full-Stack Software Engineer with 2.5+ years architecting production systems at scale using React.js, Next.js, Node.js, NestJS, AWS and delivering cloud security hardening, CI/CD automation, DRM video infrastructure, and distributed SaaS platforms serving 200000+ active users across high-growth EdTech.

SKILLS

Frontend: React.js, Next.js, Ember.js, Vite, TypeScript, JavaScript, Tailwind CSS v4, Shadcn/UI, Ant Design, SCSS, TanStack Query

Backend & Distributed Systems: Node.js, NestJS, PHP, C++, REST APIs, Webhooks, BullMQ, Redis, Prisma ORM, PostgreSQL, MySQL, MariaDB, Queue-Based Architectures, Event-Driven Systems

Cloud, DevOps & Infrastructure: AWS (EC2, S3, RDS, ECR, ECS, Cloudfront, IAM, Lambda, CloudWatch), Docker, CI/CD, GitHub Actions, Nginx, CDN, Zenduty

Security & Architecture: RBAC, JWT Authentication, Row-Level Security (RLS), AES-256 Encryption, Multi-Tenant Architecture, Idempotent Job Processing

AI Tools & Technologies: Claude AI, Cursor, Copilot, Vector DB, RAG Pipelines, AI-Assisted Development

WORK EXPERIENCE

Edmingle · *Software Engineer* · Onsite

Jul 2023 – Present

GitHub Actions CI/CD — Multi-Environment Release Automation

- **Architected and deployed** scalable CI/CD pipelines using GitHub Actions for 2 core products, enabling seamless, multi-environment releases (staging/production) via Yarn, CDN, S3, and CloudFront.
- **Eliminated** manual intervention and enhanced security by implementing OIDC for AWS authentication, removing long-lived cloud keys from CI, and establishing repeatable, auditable release processes.
- **Accelerated** engineering velocity and feedback loops by fully automating the packaging and upload process, shifting focus from maintenance to development and ensuring predictable staging-to-production paths.

AWS Cloud Security & Infrastructure

- **Led** end-to-end remediation of **50+ critical VAPT findings** across EC2, S3, IAM, RDS, and Lambda — enforced IMDSv2, least-privilege IAM, MFA on root, and removed public SNS access, cutting the platform attack surface by **40%** and achieving full compliance.
- **Automated** incident response by integrating **Zenduty** with **CloudWatch alarms**, reducing Mean Time to Detect (MTTD) by **~60%** and enabling real-time on-call escalation across the engineering team.

Video Security & Streaming Infrastructure

- **Architected** a multi-provider DRM video pipeline (Gumlet SDK, Vimeo, Videocrypt) that eliminated piracy incidents entirely and scaled live-class streaming to **100+ hours/day** with 99.9% uptime across 50,000+ active learners.

Full-Stack Communities Platform

- **Designed and shipped** an end-to-end Communities module (Next.js student app, React.js admin panel, Node + relational DB) supporting org-, batch-, and bundle-level discussion spaces and 1:1 messaging — adopted by **100% of Edmingle's enterprise clients** within 2 months of launch.

Edmingle · *Software Engineer Intern* · Onsite

Jan 2023 – Jun 2023

Assessment, Certification & Growth Systems

- **Built** a high-scale Assessment System (Ember.js, PHP, HBS) that **improved exam delivery efficiency by 50%** for 100+ admins and 50,000+ students; simultaneously engineered a Certificate Management System automating recertification workflows via email.
- **Delivered** Edmingle's marketing landing page (Next.js, Ant Design) with SSO + OTP authentication, directly contributing to a **30% uplift in new user sign-up conversion** post-launch.

PROJECTS/PRODUCTS

Duepy · **Full-Stack B2B Payment Recovery SaaS** · [Live Link](#)

[Next.js 15](#) · [NestJS](#) · [PostgreSQL](#) · [Redis](#) · [BullMQ](#) · [Razorpay](#)

- **Engineered** a distributed reminder processing system using BullMQ + Redis with delayed queues, deterministic job scheduling, retry/backoff orchestration, and idempotent workers to automate invoice recovery workflows across WhatsApp and email channels.
- **Architected** a secure multi-tenant backend using NestJS, PostgreSQL, Prisma ORM, and Supabase Auth with organization-scoped RBAC, Row-Level Security (RLS), webhook verification, and AES-256-GCM encrypted credential management for payment infrastructure.
- Built **end-to-end SaaS infrastructure** including Razorpay payment-link automation, event-driven invoice state reconciliation, real-time analytics pipelines, subscription quota enforcement, and production-grade CI/CD + deployment workflows across frontend, backend, and cloud infrastructure.

EDUCATION

Odisha University of Technology & Research (OUTR)

2019 – 2023

B.Tech in Information Technology · CGPA: **9.63 / 10** · Bhubaneswar, Odisha, India
